

The BL7000 easicode series is another new range of access controls from Borg offering a host of innovative features. Designed and built to meet a heavy duty specification, which is ideal for high traffic areas.

Sharing the same footprint as the Unican 1000 & 5000 as well as our own BL5000 series, the BL7000 series is perfect for retro-fit solutions.

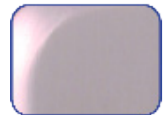

Code changing is completed on the door in a matter of seconds making it ideal for situations where regular code changes are necessary; both code changing and free passage are actuated from the inside handle preventing unauthorised code change attempts. A free access mode and an un-clutched free acting handle complete the BL7000 series heavy duty specification.

Features

- Unique `on the door` code changing
- Free acting handle
- Free passage function
- Fixing compatible with Unican 1000, 5000 & the BL5000 series
- Stainless steel coding chamber
- Heavy duty specification, ideal for high traffic environments
- Suitable for external applications
- 200,000 cycle tested
- Non-handed keypad - easily reversible on site
- 1 year guarantee against faulty materials and workmanship
- Decor plates available for retrofit applications
